

GREENGUARD CERTIFIED

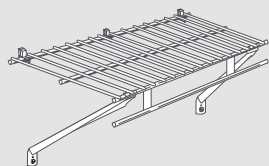

FOR HEALTHY HOMES AND COMMUNITIES

Rubbermaid® is committed to extending our sustainable practices and promoting environmental stewardship.

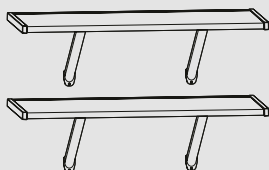

Our voluntary participation in sustainability programs shows our commitment to helping our customers build and keep healthy homes.

With over 30 years of experience providing ventilated wire shelving to builders and consumers, we pride ourselves in offering storage and organization products that help keep homes healthy and safe.

Our Wire Shelving Products:

- Made from 90% recycled and recyclable steel

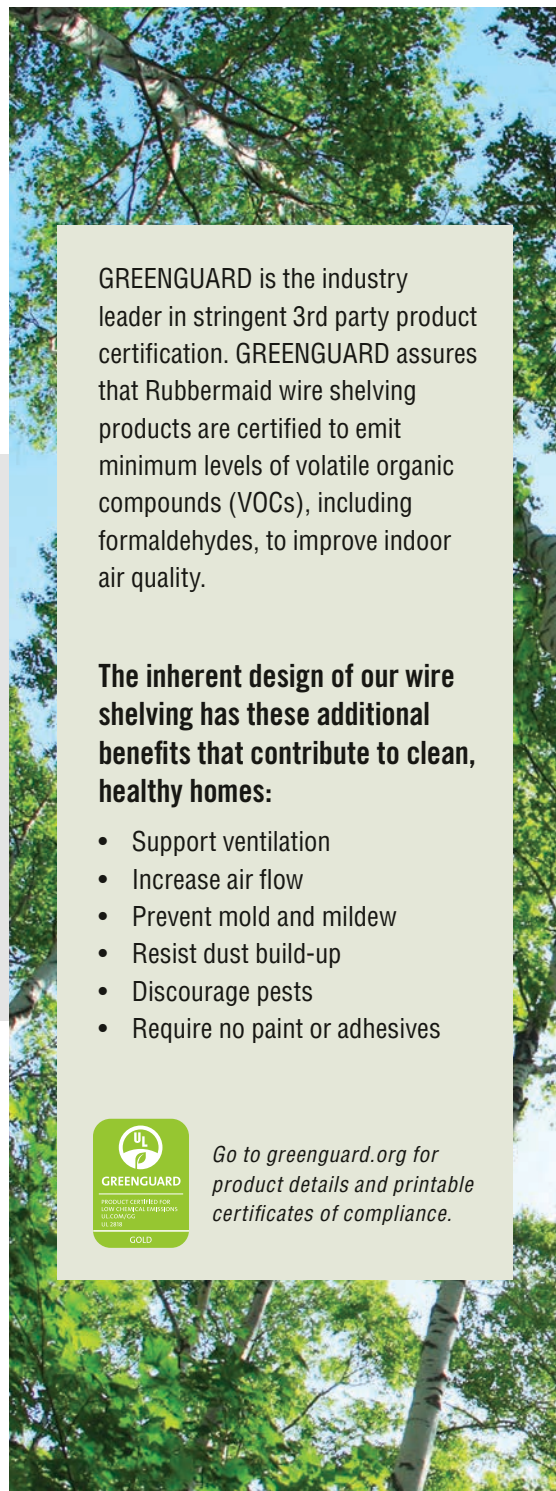

Our Wood Systems:

- Packaging is made of 100% recycled materials
- TSCA Title VI, CARB and CARB2 compliant for reduced emissions

Rubbermaid® skilled operational team is dedicated to finding environmental solutions for everyday business. We track diversion, recycling, and reuse rates in our manufacturing processes, and strive to remain environmentally conscious.

We continue to invest in green technology and build relationships with our community, suppliers, customers and stakeholders to improve the overall health of people and conserve natural resources.

GREENGUARD is the industry leader in stringent 3rd party product certification. GREENGUARD assures that Rubbermaid wire shelving products are certified to emit minimum levels of volatile organic compounds (VOCs), including formaldehydes, to improve indoor air quality.

The inherent design of our wire shelving has these additional benefits that contribute to clean, healthy homes:

- Support ventilation
- Increase air flow
- Prevent mold and mildew
- Resist dust build-up
- Discourage pests
- Require no paint or adhesives
